FOR  
SONIC THE HEDGEHOG**

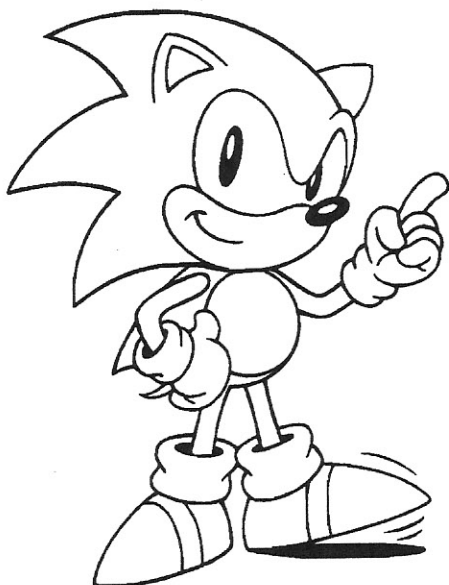

COIN OPERATED REDEMPTION GAME

COPYRIGHT SEGA ENTERPRISES, INC. (USA) AUGUST 1993

SEGA ENTERPRISES, INC. (USA) 45133 INDUSTRIAL DRIVE FREEMONT, CA 94538 PH: (415) 802-1750 FAX: (415) 802-1754  
DEVELOPED FOR SEGA ENTERPRISES, INC. (USA) BY STING, INTERNATIONAL

PART NO. 90-12-108

**LEVEL YOUR SONIC GAME PRIOR TO OPERATION!**

**PLEASE TAKE A MOMENT TO REVIEW YOUR "SONIC" MANUAL BEFORE OPERATING YOUR GAME.**

**REFER TO THE DIP SWITCH SETTINGS LOCATED WITHIN THIS MANUAL TO ADJUST YOUR "SONIC" TO THE DESIRED PLAY FUNCTIONS THAT BEST SUIT YOUR LOCATION.**

**CAUTION:** FOR PROPER OPERATION THIS GAME MUST OPERATE ON 110 VAC 60 HZ INPUT VOLTAGE.

<b>POWER:</b>	4.00 AMPS	440 WATTS	(START)
	1.75 AMPS	193 WATTS	(OPERATING)
	2.00 AMPS	220 WATTS	(MAX.)

**THIS GAME IS INTENDED FOR INDOOR USE ONLY**

**THIS GAME COMPLIES WITH THE APPLICATION REQUIREMENTS OF THE STANDARD FOR AMUSEMENT AND GAMING MACHINES (ANSI / UL 22 - THIRD EDITION).**

**THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.**

---

## **GAME CONTENTS**

**THIS GAME CONTAINS:**

1. ONE INSTRUCTION MANUAL
2. OPTIONAL PLAYFIELD ( 50 PT. JACKPOT)
3. MARS LIGHT ASSY. FOR INSTALLATION

<b>GAME DIMENSIONS</b>	UNBOXED	
	HEIGHT REAR:	56"
	HEIGHT FRONT:	39.5"
	WIDTH:	20.5"
	DEPTH:	48"
	WEIGHT:	220 LBS.

**THIS GAME IS EQUIPPED WITH AN OUTPUT JACK FOR USE WITH THE OPTIONAL "SUPER SONIC JACKPOT" PROGRESSIVE DISPLAY. PLEASE REFER TO THE DIP SWITCH SETTINGS FOR USE OF THIS ACCESSORY.**

## **SONIC PLAYFIELD OPTIONS 50 & 100 JACKPOT** **DIP SWITCH SETTINGS**

FOR USE IN SETTING THE DIP SWITCH SETTINGS ON THE CPU WHEN USING EITHER THE "100" POINT JACKPOT PLAYFIELD OR THE "50" POINT JACKPOT PLAYFIELD

BE SURE TO USE THE CORRECT PLAYFIELD GRAPHIC OVERLAY WHEN SETTING THE DIP SWITCHES.

<b>4 JACKPOTS TO WIN SUPER SONIC JACKPOT:</b>	<b>ON</b>		

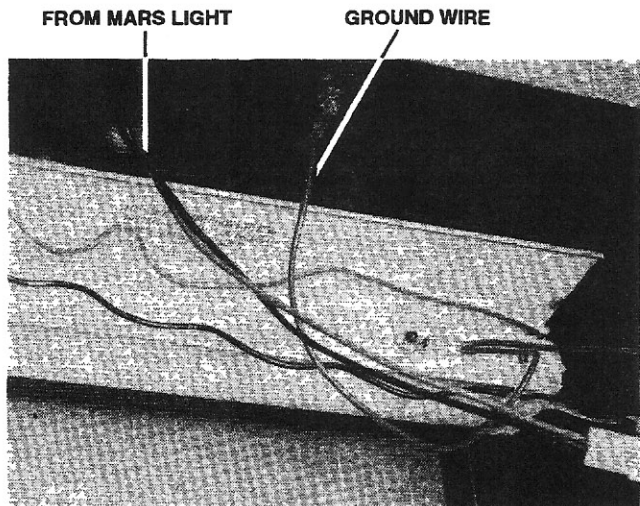

## **OPERATION AND GAME PLAY**

### **SET UP:**

1. REMOVE THE MARS LIGHT FROM WITHIN THE CASH BOX INSIDE THE CABINET.

2. INSTALL THE MARS LIGHT ON THE TOP OF THE BACK BOX OF THE CABINET BY USING THE TWO NO. 6 WOOD SCREWS AND ONE #8 CARRIAGE BOLT FOUND TAPED ON THE BOTTOM OF THE MARS LIGHT. CAREFULLY INSERT THE CABLE FROM THE BOTTOM OF THE MARS LIGHT THROUGH THE HOLE IN THE CABINET TOP. FASTEN SCREWS AND BOLT. FROM INSIDE THE BACK BOX, LOCATE THE MATCHING CONNECTOR HANGING INSIDE AND PUSH TOGETHER. LOCATE THE GREEN GROUNDING WIRE AND ATTACH TO THE BOTTOM OF THE CARRIAGE BOLT. SEE PHOTO.

3. SINCE SHIPPING CAN SOMETIMES CAUSE CONNECTORS TO LOOSEN, DOUBLE CHECK ALL CONNECTORS PRIOR TO OPERATION.

### **POWER ON:**

1. TURN POWER SWITCH TO THE ON POSITION. UPON POWER UP, CPU GREEN LED SHOULD BE FLASHING, RED LED ON THE I.O. BOARD SHOULD BE STEADY ON. THE RED LED ON THE SWITCHING POWER SUPPLY SHOULD ALSO BE ON.

FOLLOWING A SHORT DELAY, THE DISPLAY PANEL SHOULD BEGIN WITH THE VERSION OF GAME SOFTWARE ID, AND THEN BEGIN SONIC ATTRACT MODE. THIS IS A GOOD TIME TO ADJUST YOUR VOLUME LEVEL BY ADJUSTING THE BLUE VOLUME POT LOCATED ON THE CPU IN THE UPPER LEFT HAND SIDE.

### **2. LEVEL THE GAME AND PLAYFIELD**

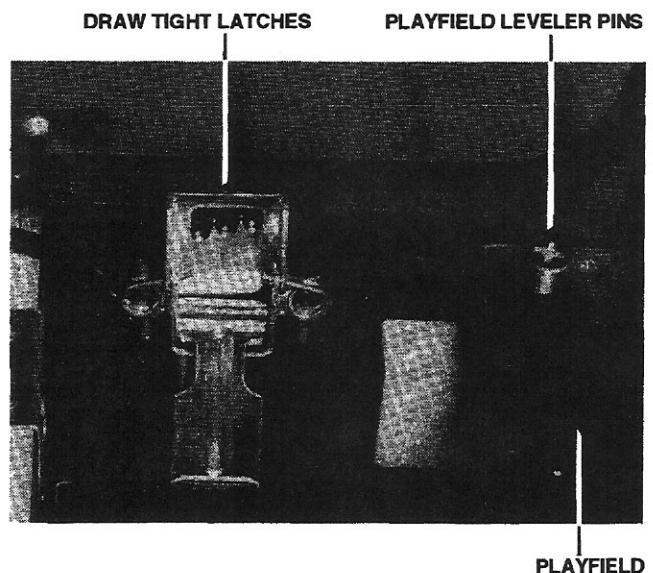

**FIRST** LEVEL THE GAME CABINET BY ADJUSTING THE LEG LEVELERS ON THE FOUR CORNERS OF THE CABINET AND CHECKING WITH AN ORDINARY CARPENTERS LEVEL.

AFTER LEVELING THE CABINET, LEVEL THE PLAYFIELD BY ADJUSTING THE LEFT & RIGHT LEVELER PINS AT EACH SIDE OF THE PLAYFIELD TOWARDS THE FRONT OF THE CABINET. THE PLAYFIELD SHOULD BE LEVELED ACROSS FROM LEFT TO RIGHT, NOT FRONT TO BACK. SEE PHOTO. OPEN THE FRONT CABINET DOOR. RELEASE THE TWO DRAW LATCHES ON EITHER SIDE OF THE CABINET INSIDE THE HINGED CONTROL PANEL. SLOWLY LOWER THE CONTROL PANEL DOWNWARDS TO ACCESS THE PLAYFIELD. REMOVE THE GLASS BY PULLING TOWARDS THE FRONT.

3. BE SURE TO CHECK THAT THE EXIT OF THE COIN RAMP RESTS ON THE SURFACE OF THE PLAYFIELD. ADJUST THE LEVELERS EQUALLY TO MAKE ADJUSTMENTS IN THE ELEVATION OF THE PLAYFIELD AS WELL.

TEST THE TRAVEL OF A COIN OR TOKEN FROM THE COIN EXIT THROUGH THE COIN MECHANISM. IF COINS SHOULD NOT TRAVEL DIRECTLY DOWN THE PLAYFIELD, MAKE ADJUSTMENTS TO THE ANGLE OF TRAVEL LEFT OR RIGHT, BY LOOSENING THE SLIDING ADJUSTMENT BRACKET ON THE INSIDE FACE OF THE CONTROL PANEL AND TIGHTENING IN POSITION.

## **YOUR GAME MUST BE LEVELED!**

4. CHECK THE PLAYFIELD FOR ANY LOOSE PACKING OR OBSTRUCTIONS WHICH MAY HAVE FALLEN INTO THE GAME DURING SHIPMENT. REPLACE THE GLASS AND RAISE THE CONTROL PANEL UPWARDS. DO NOT FORGET TO ATTACH THE DRAW LATCHES.

**NOTE: NEVER MOVE OR PULL THE GAME CABINET BY THE CONTROL PANEL. THIS MAY WEAKEN THE DRAW LATCHES.**

5. INSTALL TICKETS THROUGH THE TICKET DOOR.

## **GAME AUDIT FUNCTIONS**

### **AUDIT TABLES:**

ON THE INSIDE OF THE FRONT CABINET DOOR, YOU WILL FIND THE AUDIT TABLE ACCESS BUTTON. DEPRESS THIS BUTTON ONCE TO ENTER THE AUDIT DISPLAY FOR BOOKKEEPING AND PLAY SETTINGS.

DEPRESSING ONCE ENTERS THE AUDIT TABLE. DEPRESS AGAIN TO CYCLE THROUGH THE DESIRED TABLES. TOTAL COINS, TOTAL TICKETS, TOTAL JACKPOTS, AVERAGE TICKET PAYOUT, AND PLAYFIELD SPEED LEVEL MONITOR DISPLAYS ARE SHOWN.

TO RESET AUDIT TABLES FOR DAILY OR WEEKLY ACCOUNTING, DISPLAY THE DESIRED AUDIT TABLE BY DEPRESSING THE AUDIT ACCESS BUTTON. THEN, DEPRESS THE AUDIT TABLE CLEAR BUTTON FOUND INSIDE THE TICKET DOOR TO ZERO OUT THE TABLE. EACH TABLE MAY BE RESET IN THIS MANNER.

### **PLAYFIELD SPEED CONTROL**

#### **PERCENTAGING THE GAME**

THE PLAYFIELD SPEED SETTING ADJUSTS THE PAYOUT PERCENTAGE OF THE GAME BY ADJUSTING THE SKILL REQUIREMENTS TO ACCURATELY CAPTURE A DESIRED TARGET IN THE TIMING OF THE PLAYFIELD CYCLING RATE.

THE PLAYFIELD CYCLE RATE (SPEED) MAY BE ADJUSTED BY ENTERING INTO THE AUDIT TABLES TO THE SPEED SETTING AND THEN TURNING THE PLAYFIELD CYCLE RATE ADJUSTMENT DIAL TO THE DESIRED SETTING SHOWN IN THE DISPLAY. THE FASTER THE PLAYFIELD SETTING, THE HARDER THE GAME IS TO PLAY.

THE CYCLE RATE ADJUSTMENT KNOB IS LOCATED ON THE FRONT DOOR NEXT TO THE AUDIT TABLE ACCESS BUTTON. ADJUST UP OR DOWN FOR SPEED SETTINGS DISPLAYED IN THE DISPLAY PANEL WHEN ENTERED INTO THE "SPEED" SETTING.

#### **THE RECOMMENDED FACTORY SETTING IS 4.**

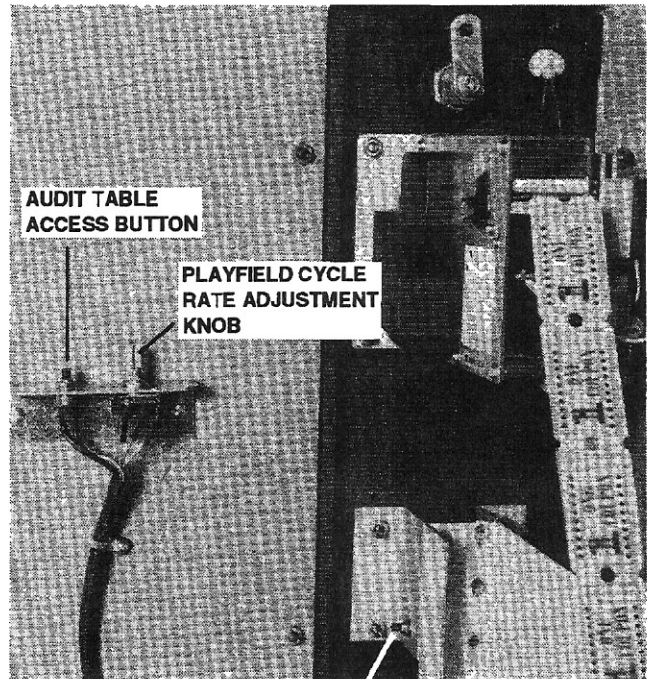

DEPRESS AGAIN FOLLOWING THE SPEED TABLE AND THE GAME WILL RETURN TO NORMAL PLAY.

### **UNPAID TICKETS**

WHEN THE TICKET DISPENSER IS LOW ON TICKETS, THE LOW TICKET INDICATOR LED ON THE TICKET DOOR WILL LIGHT.

IN THE EVENT A TICKET DISPENSER SHOULD RUN OUT OF TICKETS IN THE MIDDLE OF AN AWARD, THE UNPAID BALANCE OF TICKETS WILL BE HELD IN MEMORY UNTIL A NEW BUNDLE OF TICKETS HAVE BEEN INSTALLED AND THE UNPAID TICKET BALANCE DISPENSE BUTTON LOCATED INSIDE THE TICKET DOOR HAS BEEN DEPRESSED.

WHEN A TICKET DISPENSER RUNS OUT OF TICKETS, THE DISPLAY WILL FLASH "OUT OF TIX" UNTIL A NEW TICKET SUPPLY HAS BEEN INSTALLED AND THE BALANCE PAID.

**UNPAID TICKET BALANCE DISPENSE /  
SUPER SONIC JACKPOT RESET (ACCESSORY)**

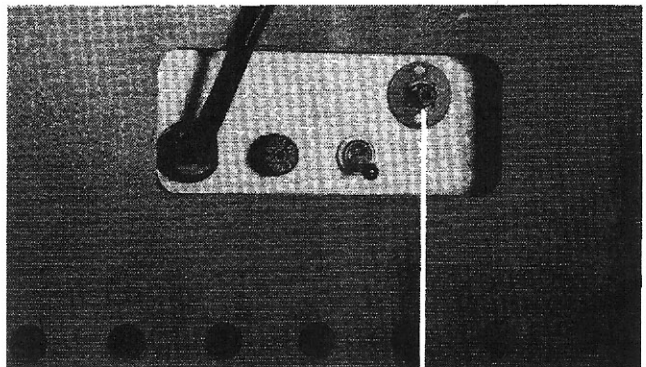

### **SUPER SONIC JACKPOT**

**\* THIS IS AN ACCESSORY AVAILABLE FROM YOUR SEGA DISTRIBUTOR FOR USE ON YOUR SONIC GAME.**

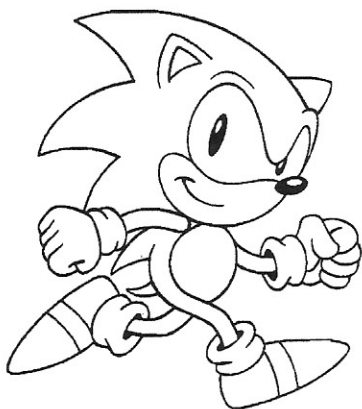

WHEN USING A "SUPER SONIC JACKPOT" ACCESSORY DISPLAY, THE BUTTON LOCATED INSIDE THE TICKET DOOR IS ALSO USED TO RESET THE GAME FOLLOWING THE "SUPER SONIC JACKPOT" WIN SCENARIO.

THE "SUPER SONIC JACKPOT" ACCESSORY IS CONNECTED TO THE BACK DOOR OF THE GAME CABINET BY CONNECTING THE COMMUNICATION CABLE INTO THE RCA JACK LOCATED ON THE SWITCH PANEL.

BE SURE TO EXCHANGE THE SOFTWARE ROM SUPPLIED WITH THE JACKPOT ACCESSORY KIT WITH THE GAME ROM INSTALLED ON THE CPU. THIS NEW ROM CONTAINS ALL OF THE EXISTING SONIC SOFTWARE AND ADDS THE JACKPOT COMMUNICATION SOFTWARE AS WELL.

**SUPER SONIC JACKPOT ACCESSORY RCA JACK**

## **SONIC THE HEDGEHOG BASIC GAMEPLAY**

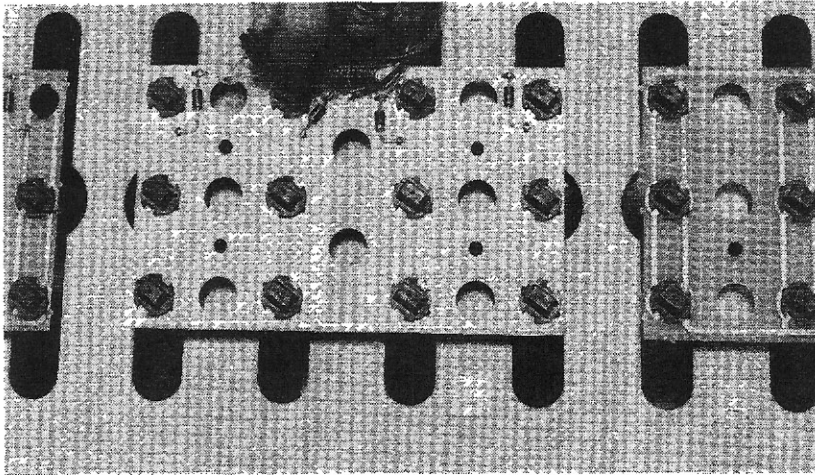

1. THE CONCEPT OF "SONIC THE HEDGEHOG" IS TO EFFECTIVELY TIME THE RELEASE OF YOUR COIN TO CAPTURE THE MOVING LIGHTED PLAYFIELD LOCATION. EACH TARGET ZONE DISPLAYS A DIFFERENT TICKET VALUE. WHEN A TARGET ZONE IS LIT, IT IS ACTIVE AND ANY COIN PASSING OVER A LIT TARGET ZONE WILL AWARD THAT TARGET ZONE VALUE DISPLAYED. SIMPLY TIME THE RELEASE OF YOUR COIN TO ROLL ACROSS THE DESIRED TICKET VALUE WHEN IT IS LIGHTED ON THE PLAYFIELD. PLAYFIELD TARGETS ARE SURROUNDED BY OPTO SWITCHES WHICH DETECT THE PRESENCE OF A ROLLING COIN WHEN IT IS WITHIN AN ACTIVE (LIT) TARGET ZONE.
2. THE GAME IS ACTIVATED ONCE A COIN ENTERS THE COIN MECHANISM TO SCORE.
3. ONCE A TARGET IS SCORED, THAT TICKET VALUE DISPLAYED WILL BE DISPENSED. EVEN DURING TICKET PAYOUT, A NEW GAME MAY BE STARTED BY ENTERING A NEW COIN WHICH WILL IMMEDIATELY START THE PLAYFIELD CYCLING.
4. WHEN USING THE ACCESSORY "SUPER SONIC JACKPOT", THE GAME MAY BE SET TO AWARD THE SUPER JACKPOT BY SCORING EITHER THREE OR FOUR CONSECUTIVE JACKPOTS IN A ROW DEPENDING ON THE DIP SWITCH SETTINGS FOR THE SUPER JACKPOT. ONCE THE "SUPER SONIC JACKPOT" HAS BEEN WON, THE OPERATOR MUST RESET THE GAME BY DEPRESSING THE SUPER SONIC JACKPOT REST BUTTON LOCATED INSIDE THE TICKET DOOR.

## **CHANGING THE PLAYFIELD OVERLAY**

1. YOUR SONIC GAME COMES WITH THE OPTION OF OPERATING A PLAYFIELD WITH HIGHER OR LOWER TARGET VALUES IDENTIFIED BY EITHER A "100" JACKPOT OR "50" JACKPOT FEATURED AT THE TOP OF THE OVERLAY.
2. LOWER THE CONTROL PANEL BY RELEASING THE DRAW TIGHT LATCHES LOCATED INSIDE THE CABINET AT BOTH SIDES OF THE CONTROL PANEL. TILT THE CONTROL PANEL DOWN CAREFULLY UNTIL IT RESTS ON THE FRONT DOOR.
3. THE PLAYFIELD OVERLAY IS SIMPLY MOUNTED ON THE TWO PINS LOCATED AT THE BEGINNING OF THE OVERLAY WHERE IT IS ATTACHED TO THE PLAYFIELD. SIMPLY LIFT THE PLAYFIELD OVERLAY UPWARDS OFF OF THE PINS AND SLIDE BACK FROM BENEATH THE PLASTIC POSTS RESTING ON THE SURFACE AT BOTH SIDES OF THE PLAYFIELD.
4. INSTALL THE NEW PLAYFIELD BY GENTLY LIFTING THE EDGE OF THE PLAYFIELD PLASTICS AND SLIPPING THE OVERLAY BENEATH THE PLASTIC POSTS. ONCE IN LINE WITH THE PLAYFIELD, LOCATE THE PLAYFIELD PINS THROUGH THE MOUNTING HOLES AT THE END OF THE PLAYFIELD.
5. BE SURE TO VERIFY THE DIP SWITCH SETTINGS THAT MATCH THE JACKPOT VALUE OF YOUR OVERLAY.

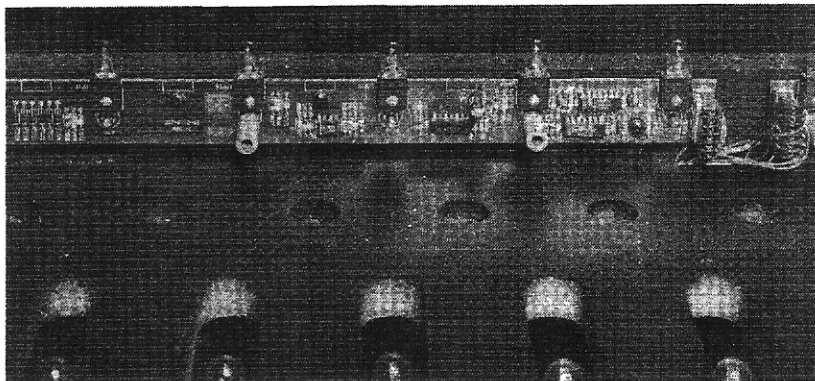

## PLAYFIELD LAMP REPLACEMENT

1. THE PLAYFIELD LAMPS ARE LOCATED ON LAMP BOARDS WHICH ARE MOUNTED ON THE UNDERSIDE OF THE PLAYFIELD. SIMPLY TWIST THE SOCKET COUNTER CLOCKWISE TO REMOVE AND REPLACE THE BULB.

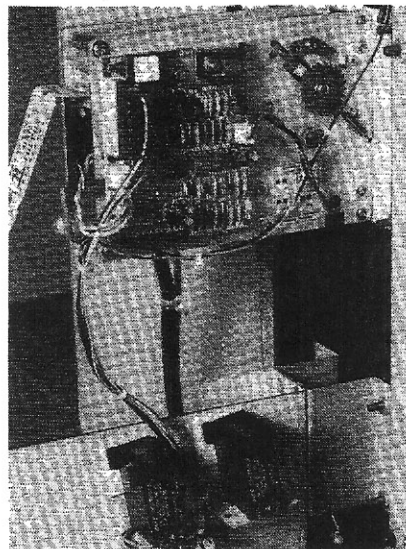

## PLAYFIELD OPTO BOARD LOCATIONS

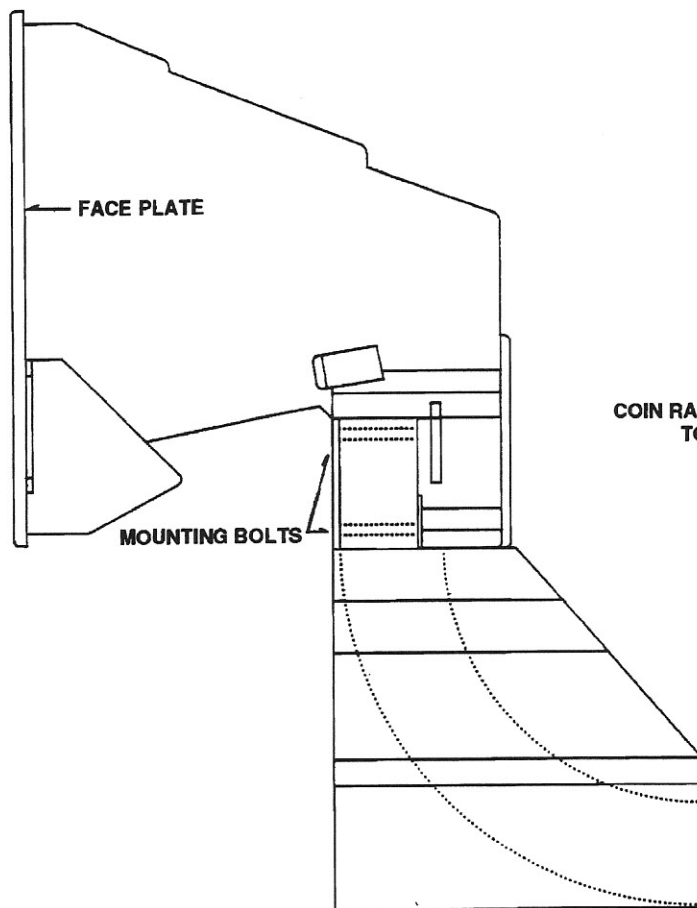

AT EITHER SIDE OF THE PLAYFIELD, OPTO BOARDS ARE MOUNTED TO THE RAILS WHICH ARE FASTENED DIRECTLY TO THE PLAYFIELD. THE OPTO BOARDS MAY BE REMOVED IN FOUR PIECES IF SERVICE IS NECESSARY. IT IS NOT NECESSARY TO REPLACE ALL FOUR OPTO BOARDS IN THE EVENT OF ANY NECESSARY SERVICE.

COIN AND TICKET METERS ARE LOCATED INSIDE THE TICKET DOOR ON THE SIDE OF THE TICKET BIN.

COIN & TICKET METERS

COIN SELECTOR W/ RACEWAY ATTACHED (SIDE VIEW)

COIN RACEWAY MOUNTING HOLES  
TO BACK OF MICRO SWITCH

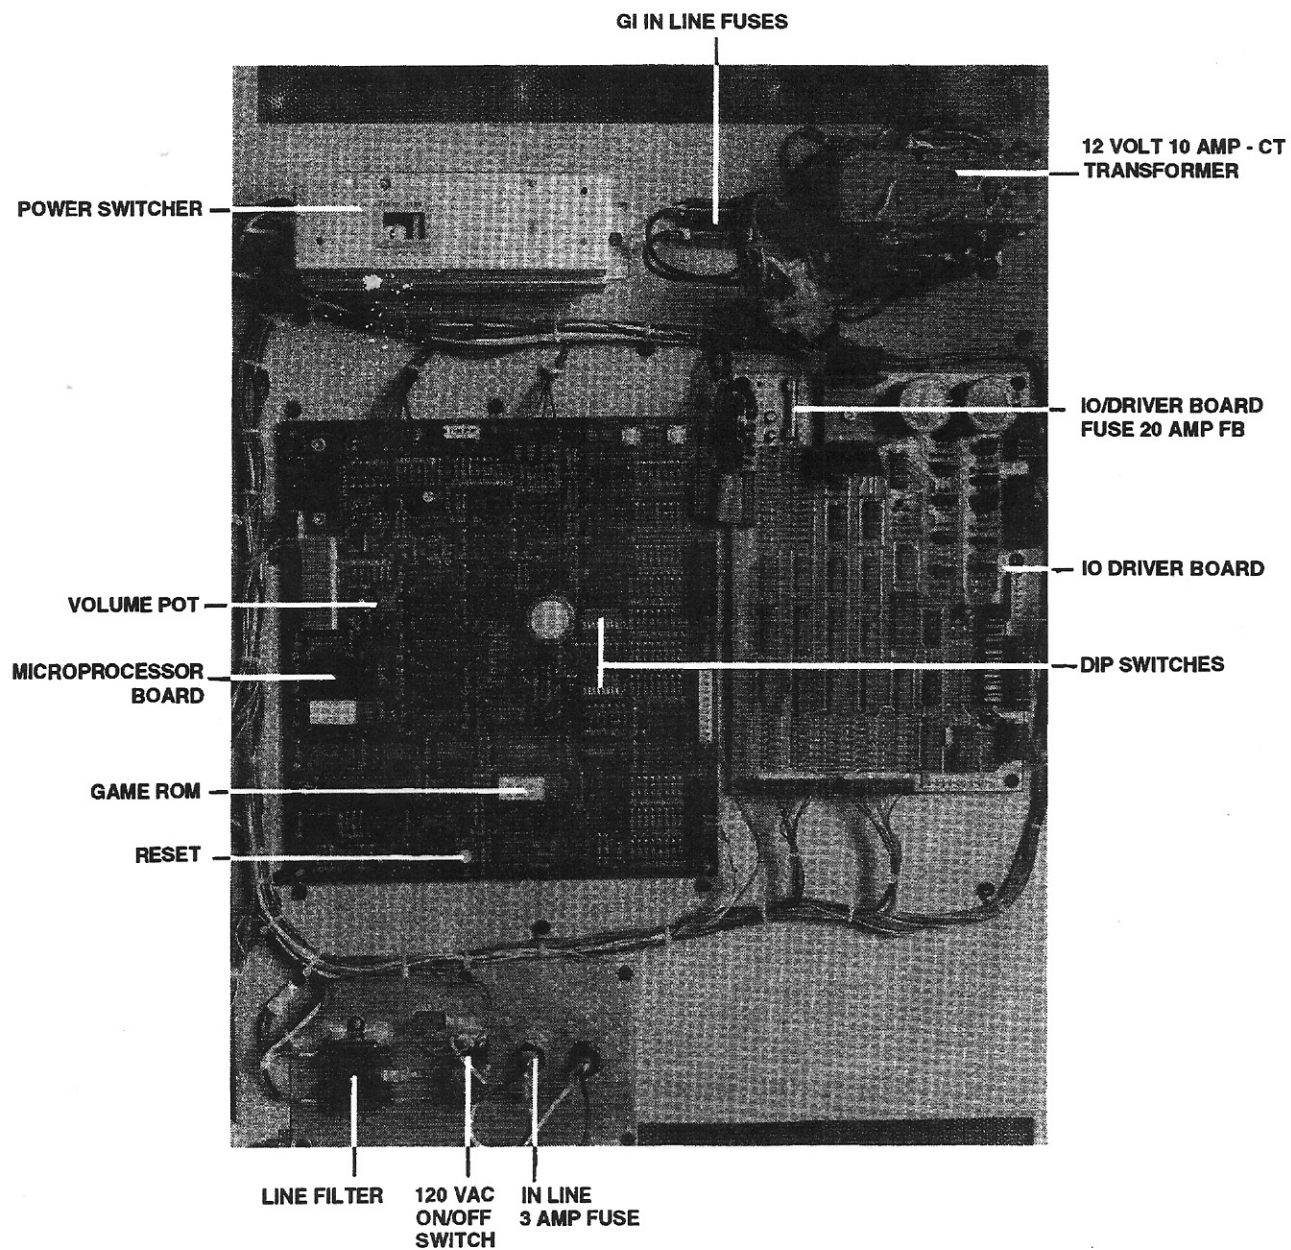

COIN RACEWAY (FRONT)

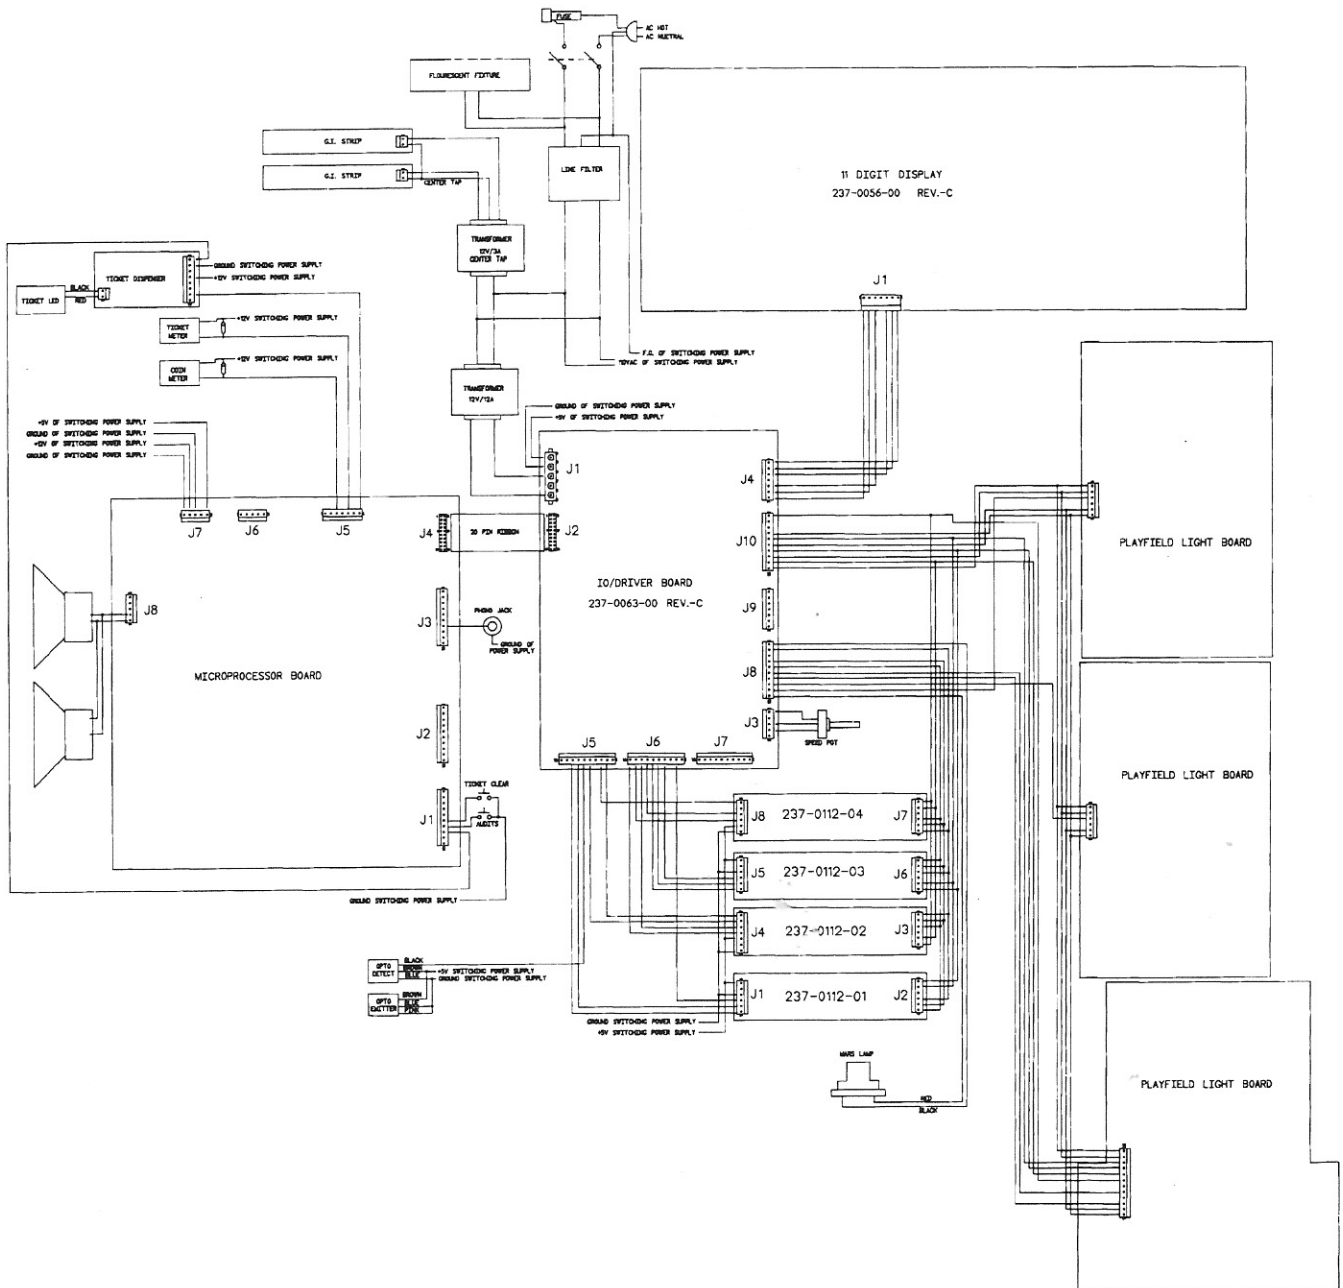

### Removal of the Asahi-Seiko Coin Selector Model # 730 - A/B

1. UNLOCK THE DRAW LATCHES FROM INSIDE THE CONTROL PANEL. CAREFULLY, TILT THE CONTROL PANEL FORWARD UNTIL IT RESTS AGAINST THE FRONT DOOR.
2. REMOVE WIRES FROM THE MICRO SWITCH. THEN, REMOVE THE GROUND WIRE FROM THE MOUNTING BOLT.
3. REMOVE THE REMAINING 3 NUTS FROM THE MOUNTING BOLTS.
4. WHILE HOLDING THE COIN SELECTOR FROM INSIDE THE CABINET, TIP THE CONTROL PANEL UPWARDS IN ORDER TO GRASP THE FACE OF THE COIN SELECTOR. FROM THE FRONT OF THE CONTROL PANEL, PULL THE SELECTOR FORWARD AND DOWN. ONCE THE SELECTOR HAS CLEARED THE CONTROL PANEL OPENING, PULL STRAIGHT OUT TO CLEAR THE COIN RACEWAY ATTACHED.
5. REMOVE THE COIN RACEWAY BY UNSCREWING THE TWO MOUNTING BOLTS ON THE BACK OF THE MICRO SWITCH BELOW THE SELECTOR. REMOVE THE MICRO SWITCH MOUNTING BOLTS ON THE NEW SELECTOR AND REPLACE THEM WITH THE COIN RACEWAY BOLTS, MOUNTING THE COIN RACEWAY ON THE NEW SELECTOR.
6. REINSTALL IN THE SAME MANNER AS ABOVE. DO NOT FORGET TO REATTACH THE WIRES TO THE MICRO SWITCH AND THE GROUND WIRE.
