At Midnight one evening in Metal City, Sonic and friends uncovered a valuable Chaos Emerald. As they stood admiring it, a mysterious trio on floating Extreme Gear airboards appeared out of nowhere and snatched the precious gem.

As they raced away, one of the three dropped their airboard and Sonic jumped aboard to pursue the thieves. But unaccustomed to riding, he lost his footing and they got away.

Later, as Sonic and friends gathered in Metal City Plaza, they were interrupted by Dr. Eggman speaking from a giant building monitor.

"I've put together a little extra something to spice things up! I call it the 'EX World Grand Prix!' A tournament to see who's the best of the best with Extreme Gear!"

Sonic groaned with disdain.

"Eggman again! Just what is he up to this time?"

At that moment, the three mysterious Chaos Emerald thieves appeared as top ranking entrants on the monitor and Sonic's attitude changed.

"The EX World Grand Prix, huh? Let's do this!"

Sonic's mind was made up. But just what is Eggman really planning? And who are the three mysterious characters?

Sonic The Hedgehog

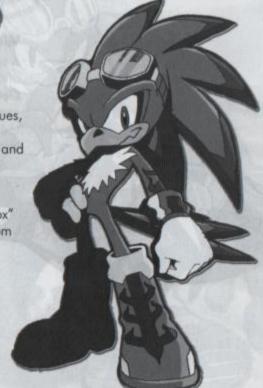

Sonic hates evil as much as he loves freedom. Sonic can be short tempered at times but will always show a gentle side to those in trouble. He's normally carefree and easy going, even when the going gets rough; but when it comes to a showdown he's aggressive and focused like a hedgehog possessed!

Sonic has always been known as the world's fastest, but since he is inexperienced with Extreme Gear, he will have to fight to hold onto this reputation.

Jet the Hawk

Known as the "Legendary Wind Master," Jet leads the Babylon Rogues, a talented group of thieves. Jet's Extreme Gear skills are revered far and wide, earning him an impressive reputation.

He carries a mysterious "control box" said to have been passed down from the ancient Babylonians.

CHARACTERS

Miles "Tails" Prower

His real name is "Miles
Prower," but his friends just
call him "Tails." He's a
little kid fox with two
tails and a heart of
gold. He loves
tinkering with
machinery and has made
various devices to help Sonic. This
time he's pitching in as the team
mechanic, fixing up the Extreme
Gear.

Wave the Swallow

A superb mechanic, Wave takes care of all of the Babylon Rogues' Extreme Gear. While she's capable of fixing many things, Extreme Gear is her specialty, and her knowledge and experience surpass both Tails and Eggman in this area.

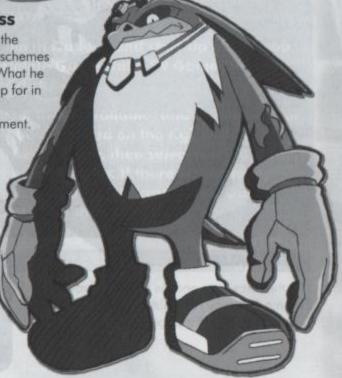

CHARACTERS

Born on Angel Island, Knuckles spends his days guarding a precious stone called the Master Emerald. His hard headed demeanor makes him gullible, and he has been tricked by Eggman on more than one occasion. Bringing his inherent aggression to the race, he plans to show Eggman that this time he means business!

Storm the Albatross

Storm is the muscle behind the Babylon Rogues' nefarious schemes and Jet's right-hand man. What he lacks in smarts, he makes up for in raw power. He has a quick temper, but is slow in movement. He tends to stutter when excited or flustered.

SURVIVAL BATTLE GAME SCREEN

EXTREME GEAR AIR SYSTEM

Racing is performed on Extreme Gear Boards powered by Air stored in the Air Tank. At regular speeds, Air is consumed fairly slowly, but special moves such as Air Slide and Air Boost will consume Air at a much higher rate. Air can be replenished by picking up Air Items, performing Trick Actions, capitalizing on your character's Special Skills, and pressing the Arrow keys and in a rapid fashion during Automatic Trails.

If the Air Tank becomes empty, you will have to run to the nearest Air Pit to fill up, perform a trick, or pick up an Air Power-Up item.

AIR PIT

Air Pit terminals allow you to quickly fill your Air Tank, and are positioned at various points around the tracks. Simply ride/run over the Air Pit to refill the tank. When the tank is full, you will automatically leave in the correct direction to continue the race. If you're in a rush, press the [X] key to leave the Air Pit immediately.

· Not all tracks have Air Pits.

CONTROLS

STEERING

ARROW KEYS - -

While riding your Extreme Gear, use the Arrow keys $\leftarrow \rightarrow$ to steer left and right around the track. The Arrow key \uparrow does not need to be held down.

AIR BOOST [Z] KEY

Press the [Z] key for an extra blast of speed. Air Boost also allows you to attack rivals ahead of you, temporarily disorientating them and costing them time. This technique consumes a considerable amount of Air, so try to use it sparingly.

AIR SLIDE [A] OR [S]

Some turns are too tight to tackle at high speed. Pressing either the [A] or [S] keys while steering into the corner will shoot a jet of Air out the side of your Gear to assist in maneuvering. Air is consumed more quickly when performing an Air Slide.

BRAKE [A] OR [S]

Press either the [A] or [S] keys to brake quickly.

TORNADO [A] AND [S] KEYS TOGETHER

If a character is too close behind you, you are then vulnerable to being attacked, or overtaken. Press the [A] and [S] keys together to create a mini Tornado that will halt your rival in their tracks. Tornados cost you both speed and Air, so check conditions carefully to make sure other players can't take advantage.

RUNNING ARROW KEYS

During the countdown at the start of the race, run toward the startline. You can boost your initial start by crossing the startline just after the countdown finishes. Don't cross it too soon or you will get electrified and brought to a standstill for a short period.

During the race, if your Gear runs out of Air, you will need to make your way on foot until you reach an Air Pit to fill up, perform a trick, or pick up an Air Power-Up item.

GIMMICKS

TRICK ZONES

These can be found at various points on each track, and act as springboards allowing you to perform a

variety of Trick Actions. To perform a simple Trick Action, press the [X] key to jump as you ride over a Trick Zone.

For a longer jump that allows greater combos, hold down the [X] key to charge as you approach the Trick Zone and release as you pass over it. Correct timing is crucial. While in the air, use the Arrow keys 1, 4,
and to perform spins in all directions.

Larger numbers of spins in a variety of directions will award you a higher Rank, which replenishes a greater amount of Air. When the Arrow keys are not being pressed, the character will automatically return to the upright position facing forward ready to land. Fail to land correctly, and you'll get a lower Rank and receive less Air.

There are two types of basic Trick Action as follows:

Back Flip

Front Flip

Hold the Arrow key 1 as you release the [X] key. Front Flips propel you further forward making it possible to reach distant Shortcuts.

GRIND RAILS

Grinding allows you to travel at speeds faster than the standard riding speed. Approach a pipe or rail suitable for Grinding (grindable rails have a blue light at the front), and press the [X] key to connect. Grind surfaces must be approached from above, so it may be necessary

to first Jump ([X] key) or make use of a ramped surface. So essentially you'll need to Jump twice to properly land on a rail.

Only Speed Type characters (p. 19) are able to Grind.

ACCELERATORS

Launch into an Accelerator and you will be propelled forward at a higher speed than normal, sometimes as a Shortcut bypassing part of the course. Use the Arrow keys to try to pass through as many Accelerators as you can for maximum speed and bonus Air.

Only Flight Type characters (p.19) can access Accelerators. This is also known as Air Riding.

BARRICADES

Some routes around the track are sealed off by obstacles such as barrels and stationary vehicles, that have to be smashed through to gain access. Smashing obstacles is as simple as riding straight into them. Try to break as many as you can in succession to receive maximum bonus Air.

Only Power Type characters (p.19) can access Barricaded areas.

AUTOMATIC TRAILS

Some sections of the race courses are automatically controlled and require no input from the player. However, in most cases, you can increase your speed and Air by pressing the Arrow keys ← and → as quickly as possible during these sections.

SHORTCUTS

Use of Trick Actions and Character Type Skills (see facing page) such as Grinding, can sometimes allow you to access hidden shortcuts around the course. Make use of these shortcuts to keep you in the lead.

TURBULENCE

Riding Extreme Gear at high speed sometimes leaves a trail of Turbulence behind which can be surfed by other characters. To surf a rival's Turbulence, approach the trail from the rear or push into it from the side, and then duck left and right quickly to increase your speed. If you can reach the source of the Turbulence, you can overtake a rival putting you in the lead.

Depending on conditions, Trick Areas may appear in the Turbulence. If your positioning is correct when these Trick Areas appear, you will automatically perform Trick Actions that increase both speed and Air.

DEVELOPING YOUR RACING SKILLS

CHARACTER TYPES

There are three different Types of characters that excel in either Speed, Power or Flight. Depending on your Character Type, additional Skills are available which can earn you bonus Air, and which give you the winning advantage.

Speed Type

Ability to Grind along edged surfaces such as rails and pipes.

Flight Type

Ability to launch off runways and fly through chains of Accelerators.

Power Type

Ability to punch through obstacles such as cars and barrels, sometimes revealing a Shortcut.

EXTREME GEAR

A range of Extreme Gear equipment is available for you to choose from. Each has its own characteristics in terms of speed, acceleration, cornering, durability, etc. Each character and Gear combination will have different strengths and weaknesses that you will need to take into consideration when refining your race style. Attributes for both characters and Gear are displayed as follows:

Dash Rate of acceleration.

Limit Maximum speed that can be reached.

Power Ability to maintain speed over rough terrain.

Cornering Ability to handle tighter corners.

The more stars there are, the stronger the attribute.

• In Normal Race Mode, some Gear may be unavailable for certain courses.

POWER-UP ITEMS

Item Boxes containing Power-Up Items can be found around each track. Simply touch an Item Box to receive the Item. Items are detailed as follows:

Rings

Gives bonus Rings in various amounts.

Air

Tops off your Air Tank by various amounts.

Magnetic Barrier*

Draws in Rings like a magnet.

Invincible Barrier*

Protection from all attacks and obstacles.

High Speed*

Sudden boost in speed.

Speed Down*

Slows you down to a crawl.

Explosion

Launches a bomb at players ahead knocking them off balance.

Question Item

Contains a mystery Power-Up Item.

^{*}Effects are for a limited time only.

LEVEL-UP

Try to collect Rings positioned around the tracks. When your Ring count reaches certain levels, you will Level-Up, increasing your parameters and abilities. If you are attacked or fall off the course, your Ring count will return to 0, and your Level will return to 1.

The Rings held at the end of each race are automatically accumulated and can later be exchanged for Gear at the Shop (see below).

SHOP

Purchase additional Extreme Gear with accumulated Rings.

When you enter the shop, select Exchange and press the [X] key. Then use the Arrow keys † and ‡ to browse the Gear. Details and parameters are

displayed on the right panel. When you decide which type of Gear you wish to purchase and have enough Rings, press the [X] key to Exchange. The Gear can then be selected from the Player Entry screen, and viewed from the Gear Gallery (p.8).

PAUSE MENU

During gameplay in all modes, press the [F] key to pause the game and bring up the Pause menu. Here you can select from the following options:

Retry Restart the current game from the beginning.

Quit End the current game and return to the Mode

Menu.

Cancel Exit the Pause menu and continue the race.

SPECIAL RULE MODES

TAG MODE

Tag Mode is selected from the Mode Select menu (p. 10). The objective is to partner up with another player or CPU character and share a single Air Tank as you race against another team. Players 1 and 2 make up the first team, and Al controlled players make up the second. If either team member crosses the line first, that team wins. Controls are the same as for the regular game modes. Shortcuts and Type Skills are not available.

During the race, it is important to keep an eye on your teammate's progress, for if you stray too far apart the player in front will be zapped and forced to wait until the other catches up. If you stay close together though, the Air Tank will be slowly topped off. The distance and relative positions of each member are easily grasped by referring to the Tag Information display at the center.

Hint: Why not make use of each other's Turbulence to leapfrog your way into the lead!

SURVIVAL RACE STAGE

Survival Race Stage is selected via Survival Mode in the Mode Select menu (p.10). The objective is to carry the one and only Chaos Emerald through a set number of Gates before the other characters do. Controls are the same as for the regular game modes. Shortcuts and Type Skills are not available.

Check the Character Map display to see your position relative to the Chaos Emerald. If another character has the stone, you will need to attack them by touching them to retrieve it. Once it's in your possession, you'll become the prime target, so watch your back!

Time is limited when the Chaos Emerald is in your possession.

SURVIVAL BATTLE STAGE

Survival Battle Stage is selected via Survival Mode in the Mode Select menu (p.10). The objective is to move around the special courses attacking the other characters until only one remains. Controls are the same as for the regular game modes.

Each character starts out with three lives, and will lose one each time he/she takes damage. When there are no more lives, the character is out. Around the course are Power-Up Items to fill your Air Tank, increase your speed to max, increase your attack power, and increase your defenses. Check the course map to find the positions of items and other characters.

• In the Space Theater Stage, opponents can only be damaged by knocking them into the electrified fences, or off the edge of the stage.

FINISHING THE GAME

At the end of a race, the race results are displayed. First, the individual lap times will be displayed together with the total race time. Shortly after, the total race times and positions for each character will be displayed.

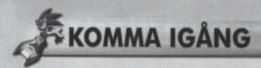

Depending on the mode, pressing the [X] key brings up the following menu:

Restart Start a new race with the same settings and conditions.

Replay Watch an action replay of the completed race.

Back to menu Quit and return to the menu.

TERVEYDELLISIÄ NÄKÖKOHTIA

• Jos olet pelannut videopeliä yhtäjaksoisesti tunnin ajan, pidä 15 minuutin tauko ennen pelaamisen jatkamista.
• Älä pelaa videopelejä, kun olet väsynyt tai et ole nukkunut tarpeeksi.
• Huolehti pelatessasi siitä, että huone on valaistu hyvin ja että istut niin kaukana kuvaruudusta kuin virtajohta sallii.
• Jotkut ihmiset kokevat epileptisiä kohtauksia katsellessaan vilkkuvia valoja tai kuvioita jokapäiväisessä ympäristössä. Nämä henkilöt vaivat saada kohtauksia katsellessaan TV-kuvaa tai pelatessaan videopelejä. Sellaisillakin pelaajilla, jotka eivät ole koskaan aikaisemmin saaneet kohtauksia, voi olla kaikesta huolimatta piilevä epilepsia. Käänny lääkärin puoleen ennen videopelien pelaamista, jos olet epileptinen. Ota heti yhteys lääkäriin, jos pelatessasi tunnet seuraavia oireita: huimausta, näkökyvyn muuttumista, lihasten nykimistä tai muita pakkoliikkeitä, epätietoisuutta ympäristöstäsi ja/tai kouristuksia.

LUVATON KOPIOINTI

Tämän tuotteen jokaisen peliosan tai koko tuotteen luvatonta jäljentämistä sekä rekisteröityjen tavaramerkkien luvatonta käyttöä pidetään melko varmasti rikoksena. LUVATON KOPIOINTI vahingoittaa sekä kuluttajia että laillisia suunnittelijoita, julkaisijoita ja vähittäiskauppiaita. Jos epäilet, että tämä pelituote on luvaton kopio tai jos sinulla on muita luvattomasti kopioituja tuotteita koskevia tietoja, soita paikalliseen asiakaspalvelunumeroon, joka on annettu tämän käyttöohjeen takasivulla.

MIKÄ ON PEGI-IKÄLUOKITUSJÄRJESTELMÄ?

Pan European Games Information (PEGI) on Euroopassa käytettävä videopelien ikäluokitusjärjestelmä. (Sitä el käytetä maissa, joissa on lain nojalla noudatettava muita järjestelmiä.) PEGI sisältää kaksi erillistä, toisiaan täydentävää elementtiä. Ensimmäinen on ikäluokitus:

Toisen muodostavat pelin sisältöä kuvaavat symbolit. Yhteen peliin voi liittyä useita symboleita. Pelin ikäluokitus määräytyy sisällön mukaan. Symbolit:

VĀKIVAITA

KIROILU

KAUHU

SEKSI

HUUMEET

CVPHINTÄ

PEGI-järjestelmän ansiosta vanhemmat ja muut lapsille pelejä ostavat vaivat valita pelaajan ikäluokalle sopivia tuotteita. Lisätietoja on osoitteessa http://www.pegi.info
