

【Multi-play mode】

●Normal Race Mode: Choose any track you want to enter. This is the mode you can play up to 4P.

●There are three race modes. One is Free race where the player competes with others, and one is Time Attack where the player aims the best record for yourself, and the last one is World Grand Prix where the player competes with others for total scores from track 1 to 5 and for being the winner.

●Tag Mode: This is a tag mode where two players will team up and compete with other team. You will share the air and help each other by playing own rule for the racing. With electric wave system, if you get close enough to the partner, you can get award, but if you get away from the partner, you will get penalty.

●Survival Mode: Mini-game mode for multi-players which you can enjoy differently from racing. There are two modes. One is Survival race where the user complete the total point in the racing track, and the other one is Survival Battle where the user aims to win based on each rule given for three race stages.
