Important Health Warning About Playing Video Games

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions:

- Sit farther from the television screen.
- Use a smaller television screen.
- Play in a well-lit room.
- Do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing

STORY

It all started in Soleanna, the beautiful city of water.

On the night of the Sun Festival, the young princess of Soleanna was abducted by none other than the calculating Dr. Eggman who was working under dark and sinister motives to destroy the special kingdom.

Sonic dashes to Soleanna to stop Dr. Eggman's malicious plot and save the princess.

Yet suddenly, a mysterious white hedgehog named Silver appeared before him. Believing Sonic to be the "Iblis Trigger," he interrupted Sonic's daring rescue with his amazing powers.

SINGLE PLAYER MODE**GAME DISPLAY****>>> ACTION STAGE (ACT) <<<**

Note: The Life Gauge of enemies will appear right above their head if they require more than a single attack to eliminate.

>>> TOWN STAGE <<<**■ ACTION GAUGE**

The Action Gauge indicates the amount of special power the character holds.

This power is required to use Sonic's Custom Actions (P.13), activate Shadow's Chaos Boost (P.14), and use Silver's telekinetic powers (P.16). Using such actions will deplete the Action Gauge, but all three characters can refill their power by collecting Chaos Drives and Light Cores (P.10). Note that Sonic and Silver's gauges are also gradually restored by time.

The Level Indicator is the 3-light display located in the right portion of the Action Gauge. The number lit is the level of the currently selected Custom Action (Sonic), or Shadow's Chaos Boost.

If you are playing as Sonic, there is another gauge below the Action Gauge which will display the maturity of the Custom Action's Level.

SINGLE PLAYER MODE

TOWN STAGE

There are two main objectives during the Town Stage. One is to seek where the next Action Stage begins, and the other is to increase your character's ability by purchasing enhancement items which will allow you to use the Power-Up moves (check P.12, 14, and 16 for their moves).

■ INFORMATION

Walk toward anyone with an icon above their head and press the X button to hear what the folk in Soleanna have to say. Information from them will usually give you a better idea as to what you should do and where to go in the Town Stage.

■ EVENT

At various times during the game such as finding an Action Stage entrance, completing an Action Stage, or meeting a special character, a cinematic presentation of the event will automatically play.

■ MISSION

You will encounter various Missions while you are in the Town Stage. These may be in the form of a trial, a task, or a battle. Complete each Mission as it's presented to advance your story.

■ SHOP

Go to the Shop to purchase various items that will enhance your main character's skills. Shop items are purchased with money you've earned mainly by clearing the Action Stages. Items sold will change according to your game progress, so browse the nearest Shop if you have a chance.

Note: Some character moves must be purchased in order to advance your story.

SINGLE PLAYER MODE

BOSS STAGE

After clearing certain Action Stages, your character must battle the Boss to advance the story. Bosses are stronger than regular enemies and will require more skill to overcome.

Most Bosses will need to be attacked in a specific way, so find the most efficient attack by locating their weaknesses. The Boss will finally be defeated when their Life Gauge (displayed in the top right) is empty.

PAUSE MENU

Press the START button to pause the game and display the Pause Menu. During the pause, select CONTINUE to resume gameplay or QUIT to exit the game.

Additionally, the START OVER option will allow you to start over the current Stage/Mission from the beginning, with the cost of one life. During the Town Stage, there will also be an option to freely save your game progress to a designated storage device.

SINGLE PLAYER MODE**ITEMS / OBJECTS**

The following items and objects found throughout the environments can help your character in the Action Stages.

**Hint Ring**

Touch and receive helpful information to assist your gameplay.

**Item Box**

SCORES AND RANKS

The Score of this game is increased by grabbing items such as Rings and destroying enemies. Points are also given when you successfully perform a series of great moves or quickly eliminate a group of enemies. On completion of an Action Stage, bonus points (based on Rings and Time) will be added to your Total Score.

The Total Score you've earned in the Stage will determine the Rank (S, A, B, C, or D) you receive in the Result screen. The higher the Rank, the more money you are awarded.

GAME OVER

You will lose a life if your character takes damage while not carrying any Rings during the Action Stage. If your character falls off a cliff, or drowns in the water areas, you will also lose a life. If you lose a life with no remaining lives, you will return to the Episode Select screen.

CHARACTER CONTROLS

Sonic The Hedgehog features three playable characters, each with their own unique moves and techniques, as detailed below. Six additional supporting characters (P.17) can also be controlled as they interact with the three main characters.

Note: Actions listed as a POWER-UP (check to the right of each action command) are available once the enhancement items are purchased from the Shop (P.8).

CHARACTER CONTROLS

CUSTOM ACTIONS

Purchasing Gems from the Shop will allow Sonic to perform various specialised actions by pressing the right trigger to leverage your gameplay. Custom Actions you've already gained can be freely selected during the Action Stage by using the D-pad. Note that Custom Actions require power on your Action Gauge, and cannot be used when the gauge is empty.

All Custom Actions are upgradable (up to Level 3) by collecting Chaos Drives (P.10) – levelling up the action will result in more power and/or better mileage from the Action Gauge. Also, levelling up a Custom Action occurs one at a time since only the selected action can absorb the power of the Chaos Drives.

SUPER-SPEED STAGES

There's no stopping Sonic during the Super-Speed Stages. Guide him left and right through the fast-paced course, jumping over obstacles in his way to reach the goal in as short a time as possible, and in one piece. Note that attack moves are not used during these stages.

PRINCESS STAGES

In certain Stages, Sonic must escort the princess to a new destination. During this time, the princess's hidden powers combine with Sonic's allowing them to project an aura that can knock out enemies and provide firm footing on unstable terrain. Hold the right trigger to activate the aura until the Action Gauge runs out. Note that certain skills will not be available to Sonic during these stages.

Chaos Boost ends when the Action Gauge reaches zero.

Viktig hälsovarning om att spela videospel

Anfall orsakade av ljuskänslighet

En mycket liten andel av befolkningen kan drabbas av epilepsiliknande anfall som kan utlösas av vissa visuella bilder, inklusive blinkande ljus eller mönster som kan finnas i videospel. Även mänskior som aldrig tidigare har drabbats av liknande anfall eller epilepsi kan lida av en icke diagnostisering åkomma, som kan utlösa dessa "ljuskänslighetsanfall" medan de tittar på ett videospel.

Dessa anfall kan uppvisa olika symptom, inklusive yrsel, synstörningar, ryckningar i ögon eller ansikte, krampryckningar eller skakningar i armar eller ben, förvirring, oklarhet, eller tillfällig medvetandeförlust. Anfallen kan även orsaka medvetlöshet eller krampanfall, som kan leda till personskador vid fall eller hopstötning med föremål i närheten.

Sluta omedelbart att spela videospel och konsultera läkare om du upplever något av ovan nämnda symptom. Föräldrar ska hålla uppsikt över eller fråga sina barn om de upplevt något av ovan nämnda symptom – det är vanligare att barn och ungdomar drabbas av dessa anfall än vuxna. Risken att drabbas av epileptiska anfall som orsakas av ljuskänslighet kan minskas genom att vidta följande försiktighetsåtgärder:

- Sitt längre från TV-skärmen.
- Använd en mindre TV-skärm.
- Spela i ett väl upplyst rum.
- Spela aldrig när du är sömnig eller trött.

Rådgör med läkare innan du börjar spela om du eller någon släkting tidigare haft anfall eller lider av epilepsi.

Kiitos, että ostit *Sonic The Hedgehog™*-pelin. Huomaa, että tämä peli toimii ainoastaan Microsoftin Xbox 360 -videopeli ja viihdejärjestelmässä. Lue tämä ohjekirja huolellisesti ennen pelaamisen aloittamista.

Tärkeä videopelien pelaamista koskeva terveysvaroitus

Tietoja valoyliherkkyyden aiheuttamista epileptisistä kohtauksista

Hyvin harvat ihmiset voivat saada epileptisen kohtauksen tietyntyyppeistä visuaalista kokemuksista. Tällaisia kokemuksia voivat olla esimerkiksi vilkkuvat valot tai videopeleissä esiintyvätkin kuviot. Jopa henkilöillä, joilla ei aiemmin ole ollut kouristuskohtauksia tai epileptisiä kohtauksia, saattaa olla taipumus "valoyliherkkyden aiheuttamiin kouristuskohtauksiin" videopelejä pelatessaan.

Kohtauksilla voi olla useita eri oireita, kuten huimaus, näkökentän muuttuminen, silmien tai kasvojen nykiminä, käsiä tai jalkojen nykiminä tai vapina, keskittymiskivyn puute, sekavuus tai hetkellinen tajunnan menetys. Kohtaukset saattavat aiheuttaa tajunnan menetyksen tai kouristuksia, jotka voivat johtaa loukkaantumiseen esimerkiksi kaatumiseen tai esineisiin törmäämiseen seuraauksena.

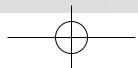

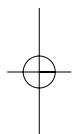

Lopeta pelaamisen heti ja hakeudu lääkärin hoitoon, jos sinulla on joitakin näistä oireista. Vanhempien on tarkkailtava lapsiaan näiden oireiden varalta ja kysytävä lapsilta oireiden ilmaantumisesta. Lapsilla ja teini-ikäisillä on aikuisia suurempia todennäköisyyksiä saada epileptinen kohtaus.

Voit vähentää epileptisten kohtausten vaaraa toimimalla seuraavasti.

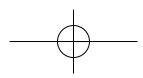

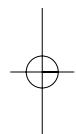

- Istu kauempaan televisiosta.
- Käytä pienempää televisiota.
- Pelaa hyvin valaistussa huoneessa.
- Älä pelaa väsyneenä tai rasittuneena.

Jos sinulla tai sukulaissillasi on ollut aiemmin tällaisia kohtauksia tai epilepsiaa, neuvottele lääkärin kanssa ennen pelaamista.
