## Starting Up

1. Set up your Genesis Emulator as dictated by your common sense. Plug in your keyboard or controller. (*Yeth* is for one player only.)
2. Make sure the emulator is OFF. Then insert the *Yeth* game into the emulator and press it down firmly.
3. Turn the emulator ON. In a few moments, the SEGA screen appears.
4. Press Start when the Title screen appears.

**Important:** If the SEGA screen doesn't appear, turn the emulator OFF. Make sure your emulator is set up correctly and the game is properly inserted into the "Load Genesis ROM" slot, and that the screen is facing towards you. Then turn the emulator ON again.

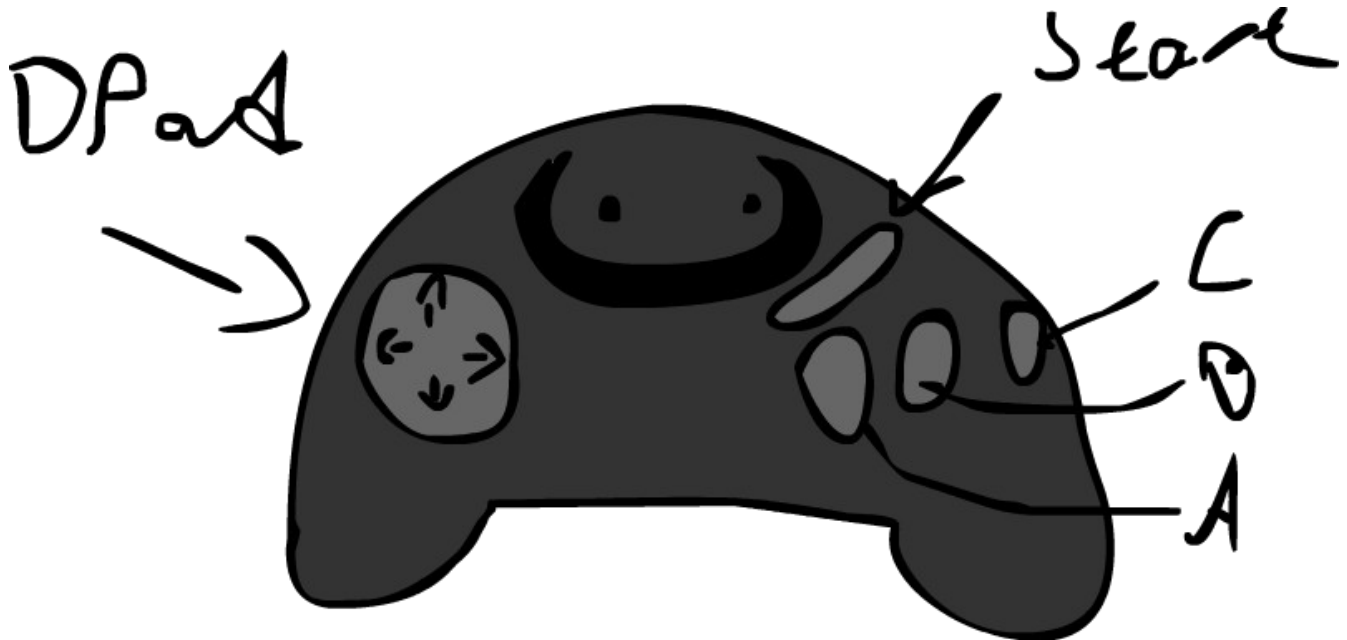

# Your Story

Bob was an okay guy. An okay guy who cosplayed, but this is besides the point. One day, Bob stumbled upon a mysterious website link. Upon entering said website, Bob was treated to hundreds of flashing pieces of text, creating a seizureiffic screen simply saying "yes yes yes yes yes yes yes". In the middle was a strange, creepy face whose mouth appeared to stretch beyond its eyes. The strangeness of this website utterly confused poor Bob, keeping him up at night trying to figure out what it all meant. Bob eventually went insane thanks to this website; it began to take over his life, and eventually all he ever knew was "yes". A white stress tumor with the website's face engraved on it began to build up inside of him, slowly taking over him, eventually replacing all but Bob's signature red gumboots. The combination of all this with Bob's crippling lisp gave him the brand new identity of "Yeth". The newly-christened Yeth now sets out to find out what is up with this website that ruined his life, and to regain his old body.
